

# EASY-CORE

# 208

The Easy-Core 208 is built for speed using a powerful hydrostatic drive to make it one of the most productive aerators on the market today. It is designed to withstand the challenge of use on sloped surfaces using pneumatic tires on a wide stable base. The Easy-Core 208 is ideal for use on golf courses and athletic fields, and will handle a variety of soil conditions. The Easy-Core 208 can be used in combination with an optional sulkey for transport from tee to tee, or to multiple locations on campus without the need for loading.

# EASY-CORE 208
