2100 & 2400

The new Speed-Seed models 2100 and 2400 are ideal to over-seed large areas quickly. The front spiked roller made of individual cast rings creates thousands of holes and can easily turn along any obstacles in its path. This seeder is designed for the turf manager that does not like the traditional rows created by other machines on the market.

SPEEDSEED 1200 & 2400
